NTSIKA NGILANE

AI Engineering Student | Full■Stack Software Developer | Technical Artist | Technology Entrepreneur

Email: workngilane@gmail.com
Location: Pretoria, Gauteng, South Africa
GitHub: github.com/Ntsika-Ngilane-dev
Portfolio: ntsika-ngilane-dev.github.io/ntsika-portfolio/
LinkedIn: linkedin.com/in/ntsika-ngilane-7014aa370/

Professional Summary

AI Engineering student at Zaio with experience spanning software engineering, full■stack development, artificial intelligence, healthcare technology, product development, 3D visualization, Unreal Engine, Blender, Spline, and digital content creation. Proven ability to design, develop, and deliver complete applications from concept through deployment while combining technical expertise with entrepreneurial thinking.

Education

Zaio Institute of Technology
Artificial Intelligence Engineering (Current)
Focus Areas: Artificial Intelligence, Machine Learning, Software Engineering, Python Development, Cloud Technologies, Data Structures & Algorithms.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend: React, React Native, Vue.js, Tailwind CSS, Material UI
Backend: Node.js, Express.js, REST APIs, Authentication Systems
Databases: PostgreSQL, MySQL, SQLite
AI: AI Engineering, Machine Learning Fundamentals, Automation, Prompt Engineering **3D & Visualization:** Blender, Spline, 3D Modelling, Rendering, Animation, Product Visualization
Game Development: Unreal Engine, Real■Time Rendering, Interactive Experiences **Media:** Video Editing, Photo Editing, Graphic Design, Content Creation
Tools: Git, GitHub, VS Code, Postman, Figma

Selected Project Portfolio

Netflix Clone – Full■stack streaming platform demonstrating React architecture and modern web development.

NeighWatch – Community-focused software platform demonstrating full■stack development skills. **Z3nith** –

Modern application showcasing frontend and backend integration.

Odd Jobs Marketplace – Marketplace platform supporting service discovery and user interaction workflows.

NARA Healthcare Platform – Healthcare technology platform with authentication and dashboard systems.

LINQ Healthcare Initiative – Founder and developer of diabetic healthcare technology concepts. **Health**

App & HealthGums – Health and wellness technology projects focused on user-centered solutions. **Hotel**

Booking Application – Reservation and accommodation management system. **Banking Application** –

Financial services application demonstrating structured software design. **Blog Website & Portfolio**

Website – Content publishing and professional branding platforms.

OpenLibrary Bookstore Inventory Manager – Python-based inventory management solution.

Python Task Tracker – Productivity-focused application built with Python.

Vue Todo & JavaScript Todo Apps – Frontend projects demonstrating framework and language proficiency.

Snake Game – Programming and game development fundamentals project.

3D Visualization Projects – Blender and Spline renders, animations, and product visualizations.

Unreal Engine Projects – Interactive environments and real■time rendering experiences.

Core Competencies

Full■Stack Development • Artificial Intelligence • Machine Learning • Software Engineering • Product Development • Healthcare Technology • Database Design • Technical Research • 3D Visualization • Unreal Engine • Entrepreneurship • Problem Solving • System Architecture
